HOUSTON, TEXAS – October 11, 2006 - Enterprise Systems Corporation announced today that 2H Offshore has chosen Enterprise Systems to provide Nortel Voice Solution consisting of a BCM400 with Voicemail. The Corporate Office located in the United Kingdom selected Nortel as the standard globally due to its superior IP networking capabilities, IP sets and their built in quality of service components. Enterprise Systems will be responsible for networking to the UK via IP trunks over a private network and deploy 50 IP sets locally. 2H is moving their existing location to a new building and the location will be all new build out. 2H decided on a separate voice network locally and Enterprise Systems designed a 96 Port PoE 10/100 ethernet solution to accommodate immediate and future growth needs. Enterprise Systems also cabled the offices for both voice and data networks. According to Cary Griffin of 2H Enterprise's teams did an excellent job in all areas and the installation was an absolute success.
