HOUSTON, TEXAS – March, 2004 - Enterprise Systems Corporation announced today that Allen Systems Group (ASG) has chosen Enterprise Systems to perform installation of a complete Nortel Networks VoIP solution for its Naples, Florida facility. The site will include a Succession 1000 with a complete compliment of i2004 IP end points (instruments) and Baystack Ethernet Switches. Additionally, the Succession 1000 will be IP Peer Networked with Succession Branch Offices at ASG's outlying locations in:

- Irvine, California
- Nashua, New Hampshire
- Manhattan, New York
- Seattle, Washington
- Chicago, Illinois
- Atlanta, Georgia.

"Working with Nortel Networks and Enterprise Systems, ASG has been able to develop and deploy a global communications solution encompassing voice, and data, supporting corporate, branch, and remote office employees helping us to increase productivity and reduce expense" remarked Aaron Isban, Director of Global Telecommunications.

"Allen Systems Group has a significant investment in Nortel Networks Meridian 1 switches. ASG is a textbook case of Nortel's Evergreen strategy. Over time ASG has been able to evolve at their own pace, deploying VoIP and other new technologies when it makes practical business sense, and retaining a significant portion of their initial investment. " said Sean Pyykola, Vice President of Enterprise Systems.
