Houston, Texas 77043

Re: Reference Letter

To whom it may concern:

Republic National Bank has been utilizing the consulting and technical expertise of Sean Pyykola, Rodney Hyde and Tommy Cross for over four years now.

Our network consists of several Meridian 1 systems utilizing four digit dialing between sites, centralized trunking and Voice over IP applications.

This team of individuals has always demonstrated a high level of customer service and follow-up as well as a very high degree of knowledge in regards to Nortel Networks product.

I do not hesitate to recommend Enterprise Systems to any organization that requires consultation and implementation of the Succession/Meridian 1 product or its applications.

I am pleased Nortel Networks is working with Enterprise Systems as a valued partner.

Sincerely,

Brandon Burk
Vice President
